---

# Underinvestment in Energy Efficiency

- Countries buy too much energy and too little efficiency
    - Typical payback periods for investments in energy efficiency are 2-3 years
    - Typical payback for power generation investment is 10 years or more
  - Other barriers
    - Lack of information, capability, financing
-

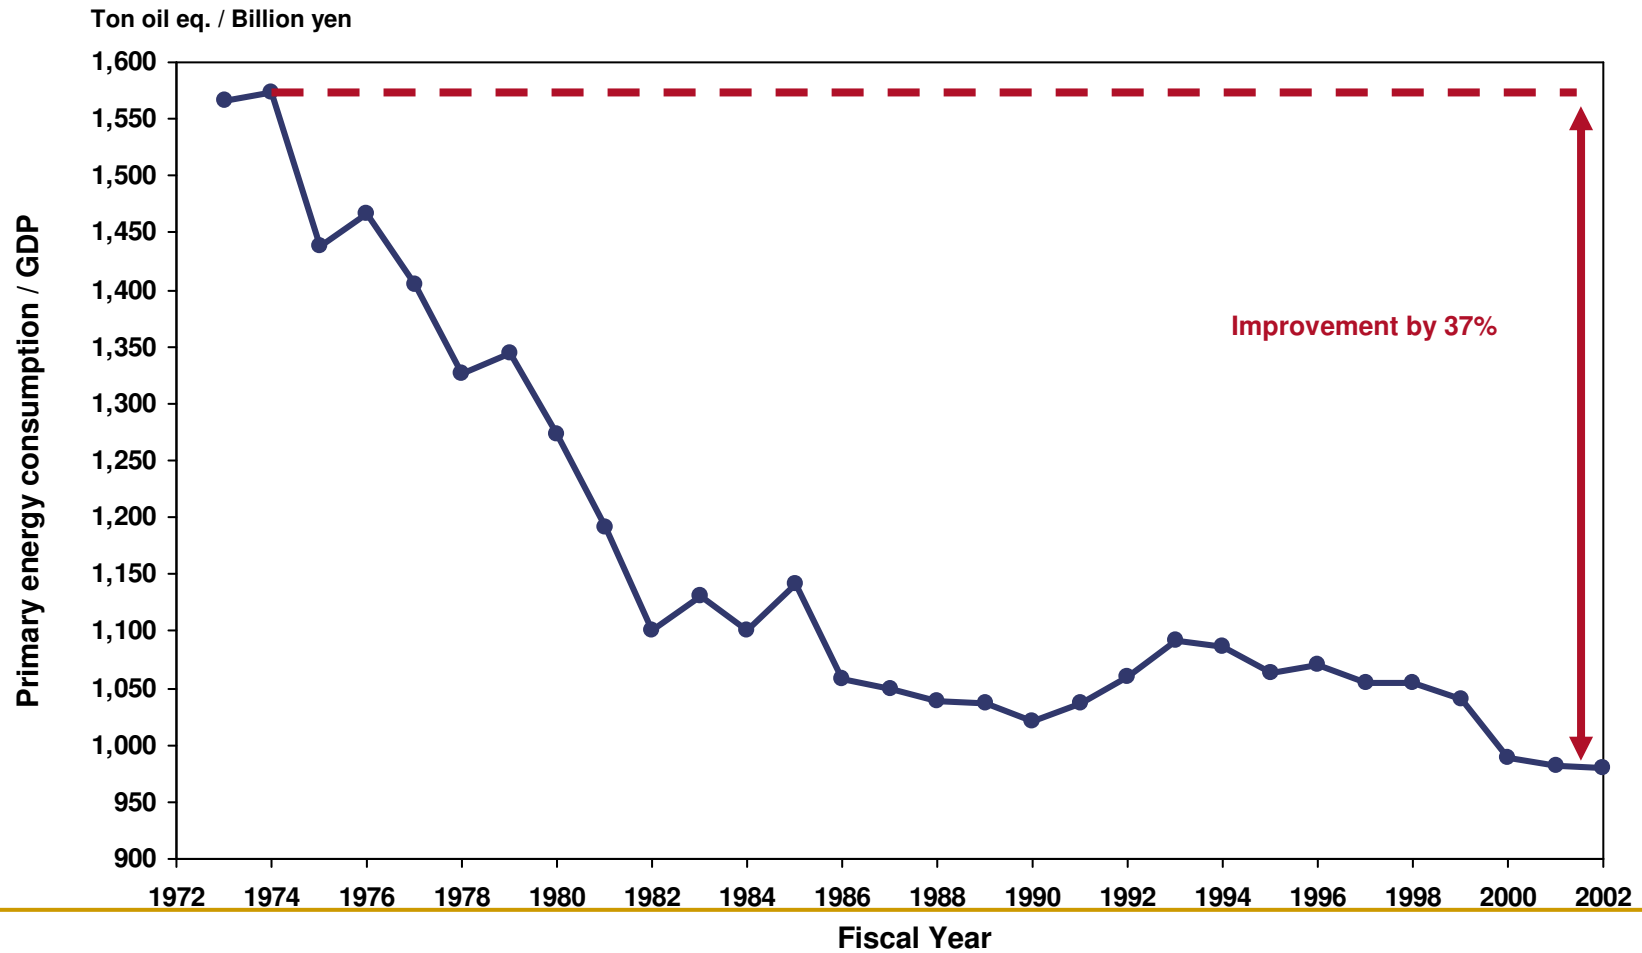

---

# Role of Government

- Engage
    - Raise awareness and visibility of energy use
  - Encourage and Enable
    - Incentivise investments in energy efficiency
    - Build capability to become more efficient
  - Enforce
    - Minimum standards in energy efficiency
-

# What's possible

## Changes in Energy Intensity in Japan
